

HAND WELDING EXTRUDER WIN 610C

PRODUCT INFORMATION

Hand Welding Extruder WIN 610C

This plastic hand extruder uses a 1300w original imported German Metabo electric drill as the extrusion motor, with high power, low resistance and strong protection. And adopting dual heating can independently control the heating temperature of the base material and the welding rod, which makes the welding efficiency higher and the welding seam quality better. The shape design of the air blower under the extrusion drill enables workers to weld quickly even in small welding occasions. It is also equipped with a welding rod heating digital temperature control display, a 360-degree rotating welding nozzle, convenient operation, stable performance, large extrusion capacity, and continuous welding. Mainly used in HDPE, PP plastic pipes, plastic plates, plastic decks, Welding of plastic water tanks and plastic film materials.

Provide neutral packaging and small batch of customized services. Provide a variety of welding boots small batch customization services. The LCD display of the control box is more intuitive and convenient. CE certification testing by third party.

SPECIFICATIONS

Model	WIN 610C
Rated Voltage	230V
Frequency	50/60HZ
Extruding Motor Power	1300W
Hot Air Power	1600W
Welding Rod Heating Power	800W
Air Temperature	20-620
Extruding Temperature	50-380
Extruding Volume	2.0-3.0kg/h
Welding Rod Diameter	Φ3.0-5.0mm
Driving Motor	METABO
Body weight	7.2kg
Certification	CE
Warranty	1 year
